

How to join a Crypto Angel ICO?

Step 1: Create your own Ethereum wallet

First of all, you will need to set up your Ethereum wallet. There are many tools and apps for that out there but not all of them support ERC-20 tokens, and you will need one that does.

We recommend using one of the following:

- [MyEtherWallet](#)
- [Ethereum Mist Wallet](#)
- Ethereum's [online wallet](#)

Although you can use any of these three, we will use MyEtherWallet as an example.

If you don't have an ETH wallet, here's a video how to set it up

Step 2: Send ETH to the our Token Sale smart contract address

Open [MyEtherWallet](#) and click 'Send Ether & Tokens', type in our Token Sale smart contract address: **0x5983f1eB0508190e821E380A8Ed273725f5d927C** into 'To Address' field (ctr-v), type in the amount of Ether you want to invest and volume of Gas you're expecting to spend (we recommend Gas Limit of 200,000). The last thing you have to do is to click 'Generate Transaction' and then 'Send Transaction'.

When the Smart Contract receives your Transaction, you will automatically get the right amount of Crypto Angel (ANGEL) tokens back in to your Wallet.

That's it! Now you're a happy owner of those much desired ANGEL tokens. Let's put them into your MyEtherWallet.

Step 3: How to add your ANGEL tokens to your MyEtherWallet

Start your Ethereum wallet, to the right you'll see a block called 'Token Balances'. Click 'Add Custom Token' and type in Crypto Angel Smart Contract Address:

0xe7fad78cf9034b36b6a7dc2951e5acf8d28e4dc7, Token Symbol: ANGEL and Decimals: 18.
